OBJECTIVE

Results-oriented Front-End Developer with expertise in HTML, CSS, JavaScript, jQuery, and React JS. Proven track record of providing strategic solutions and optimizing processes. Excited to leverage analytical and problem-solving skills for your team.

EDUCATION

Bachelor of Commerce (B.Com), Kuvempu University   Aug 2019 - Dec 2023
GPA: 78.60

SKILLS

Web Development	HTML, CSS, Bootstrap, JavaScript, jQuery, React JS
Programming Languages	Familiarity with C++
Analytical Mindset	Applied skills during internship for process optimization
Project Collaboration	Effective collaboration with cross-functional teams

EXPERIENCE

Codsoft — Internship — January 2024 - February 2024

Applied analytical skills to real-world projects, optimizing processes and workflow. Collaborated with cross-functional teams, enhancing project outcomes through problem-solving. Fostered a collaborative work environment and actively participated in knowledge-sharing sessions.

PROJECTS

ToDo list. Showcased a dynamic Todo List project using React, emphasizing user-friendly design, efficient state management, and modular code. Demonstrates my practical application of React for creating functional and responsive web applications. (Try it here)

Password Generator. Built a secure and user-friendly Password Generator using React. Features include customizable options and responsive design, showcasing my proficiency in React development for practical applications.

Portfolio Website. My portfolio website is a concise representation of my skills and personality. Built with clean HTML and CSS, it reflects a commitment to excellence in a visually appealing and responsive design. Explore to discover the essence of my professional identity.

EXTRA-CURRICULAR ACTIVITIES

- Organized and led a tech-themed workshop at a local community center, educating participants on the basics of web development and promoting digital literacy.
- Coordinated and hosted technology meetups within the community, facilitating knowledge exchange and networking opportunities among local tech enthusiasts.

LEADERSHIP

- Web Development Team, Codsoft: Orchestrated and led a cross-functional team of developers in the successful completion of a critical web development project. Coordinated tasks, managed timelines, and ensured the project's alignment with organizational goals.
